My Glasgow App

Glasgow City Council has developed a new smart phone app to enable people to report issues in the city and get feedback on their reports. Download the My Glasgow App from the App store and report issues such as streetlighting faults/road faults/fly tipping to Glasgow City Council. You will receive a job reference number and updates to advise when your request has been dealt with and what action was taken. Please contact Lyndsay at the office if you would like any assistance downloading the App.
